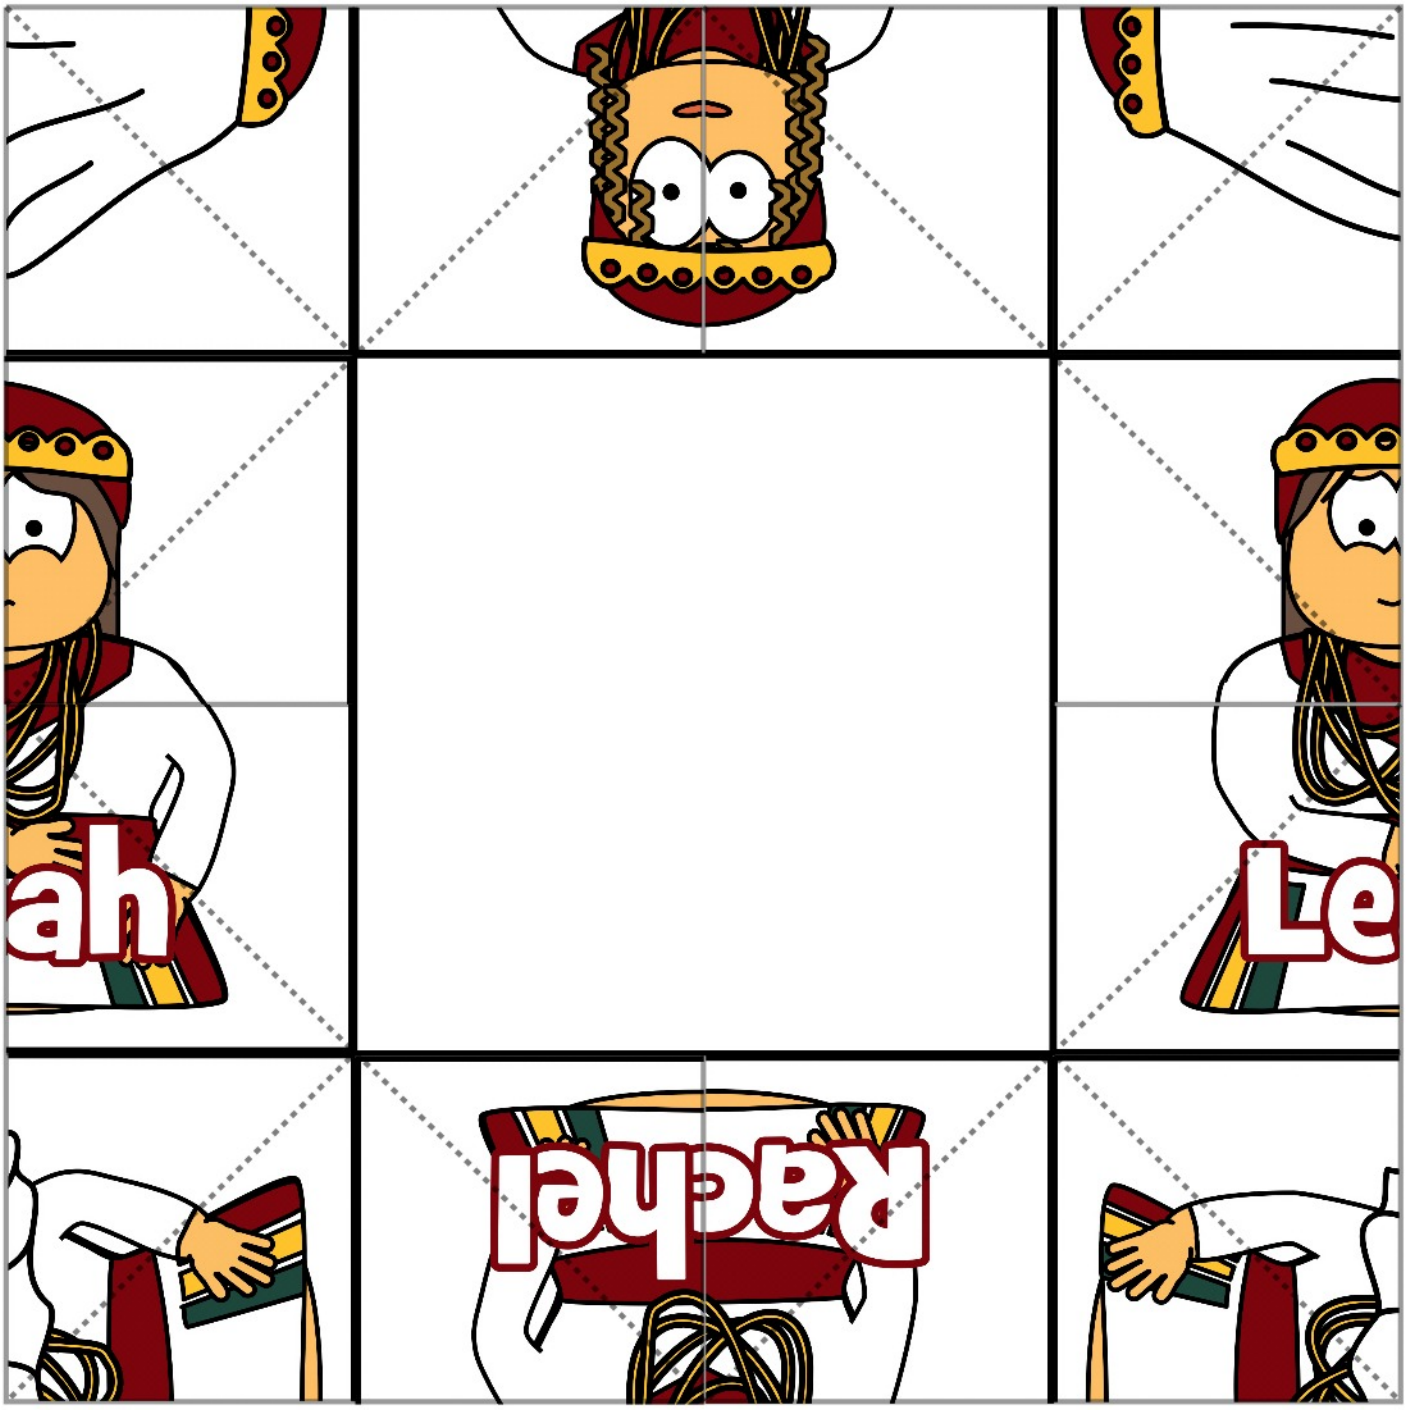
Scissors

# Instructions

Cutting out the large square and fold every line both ways.

Open out, turn face down then fold one edge into the middle to form a thin rectangle showing the printed side.

Each flat side needs to be folded into the centre. Fold one side then fold back the corner and fold the next side – you'll know you are correct because the image will line up and it will look a bit like a pinwheel.


Open out each corner and flatten it down. Discover the other pictures as you play with the folds.
