

You'll need:

Scissors, glue stick, & torch

Instructions

Cut out the two big rectangles along the solid lines.

Glue the rectangle with the containers over the top of the other rectangle. (Add glue over the entire surface!)

Divide into six pieces along the dotted lines.

Use a torch to see what the container is hiding by placing the paper over the light.

Play a memory game: call out a symbol and race to find it in your containers.
