

You'll need:

Scissors
& glue.

Instructions

Cut out.

Take the long rectangle and fold the two longer edges to the middle (along the lines)

Where the two yellow arrows point fold your thin rectangle so the points of the arrow are touching each other. All the other sections are folded the other way.

Make a loop by gluing where indicated and attaching the other end. Stick the 2 characters on.

Position with the lame man seated on the floor. Lightly press on the standing man's head and release - he should 'jump' up.
