

Persistent Paths

Each child needs a full page of game pieces.
Cut out all the pieces, shuffle and place face down on the table.

Easy version: Draw one piece and lay face up on the table.
Add to your pathway until you have formed a circular pathway using at least 5 pieces.
Play solo or as a team.

Hard version: Same as easy version but one player tries to stop the other from winning. The one who is blocking plays the first piece.
